

DRYVAC System VAControl

Take your DRYVAC Systems to the next level! Intelligent pump control with VAControl and up to 50% energy savings with the eSaver.

The smart pump systems feature integrated power electronics, monitoring devices for purge gas systems and key parameters, easy and user-friendly operation (local/remote) and additional features, such as connection of a gauge head.

VAControl

The next generation of intelligent Vacuum Controllers is here and along with the great and easy to use HMI, it can provide insights into pump performance and features artificial intelligence on board for the future.

Connectivity

Our system offers various flexible connectivity options- connect to your laptop via LAN, tablet via Wi-Fi, or cloud via Genius. It also provides onboard security and can connect to PLC via fieldbuses.

eSaver

Reduces energy consumption of the DRYVAC DV 650 and DV 800 by up to 50%.

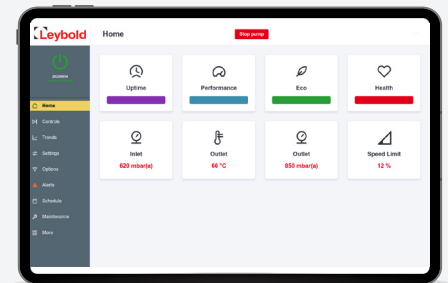

Remote control

The system can be operated via I/Os and fieldbusses, and the user interface can be controlled via LAN and Wi-Fi. No need to walk to the pump anymore.

Plug & Go

The system comes with a connection board, where only water, pressured air, exhaust and power need to be connected. Once the system is in place, a quick startup can be performed.

Pioneering products. Passionately applied.
