

Parts Care

Our Parts Care plan includes the scheduled delivery of genuine spare parts, kits and oils according to your vacuum pumps needs. This means less administration and increased uptime.

Optimized administration costs

By choosing our Parts Care plan, Leybold will take over the responsibility of sending you the necessary spare parts according to scheduled maintenance needs, determined by our experts. No more time and resources spent on procurement processes for separate spare parts orders.

High efficiency

We produce our genuine spare parts, kits, and oils with the aim of providing high quality, to ensure efficient operation and to let your production run smoothly. Leybold spare parts, kits, and oils have been tested to ensure high performance levels, a longer lifetime, and to prevent secondary damages.

Easy to use

Our service kits are assembled to meet the regular maintenance needs of Leybold vacuum pumps according to the maintenance recommendations. Leybold genuine parts achieve 100% form, fit, and function, ensuring the integrity and efficiency of your vacuum pumps.

Uptime and reliability

Getting your kits on time for your maintenance will alert your service team to the fact that they need to perform the service. In this way there is no risk of service delay, which would undermine your vacuum installation's uptime and reliability. Spare parts, kits, and oils will be delivered automatically according to the service schedule.

Leybold service – expert and reliable partner

Maintaining your uptime and reducing the risk of production downtime is critical. Wherever you are, Leybold is there to support you as your vacuum service partner. Our Field Service team and our fully equipped Service Technology Centers are at your disposal.
