

Upgrade and ensure productivity with higher utilization of your cryo pump

The cryo pump upgrade kits have been designed to help you make the most out of your investment. If you have replaced your compressor by a COOLPACKi, in combination with a cryo pump outside of the intelligent version, you are likely to encounter incompatibility and risk downtime in your operation. This can be easily avoided with the COOLPOWERi and COOLVACi upgrade kits.

FAST AND EASY

Your pump is easily upgraded with minimum downtime.

MORE RELIABLE SYSTEMS

The upgrade kit includes all required parts to transform your product in to an intelligent system.

SUSTAINABLE SOLUTION

By upgrading you avoid unnecessary scrapping, bringing cost and environment savings.

New intelligent cryo systems

With potential incompatibility, upgrading your existing vacuum pumps to an intelligent version is key to maintain your system operating at full capacity. The upgrade kits are the best option to keep your process running at its highest efficiency.

HIGHLIGHTS

90%

Up to 90% savings, compared to the investment in a new pump.

100%

100% reuse of the existing Cryo system, no waste.

1 HOUR

Is all you need for your system to be back up and running.
