

# MANAGING A LARGE VACUUM PUMP INSTALLATION IS NOT EASY

You may have multiple assets with multiple service needs or unexpected failures disrupting production, impacting energy costs and sustainability targets. What if there was an easier and less time-consuming way forward for you and your resources?

## Consultancy Services for Vacuum Pumps

### Secure a lower cost of ownership for your vacuum equipment with Consultancy Services

With Leybold Consultancy, you do not just improve vacuum pump performance; you optimize your entire process. Our team of experienced vacuum engineers goes beyond diagnostic service; they dive into your equipment operating profile to provide predictive maintenance recommendations and find opportunities for improvements and cost savings.

#### What does this mean for your operation?

Up to 80% of the most common functional failures can be prevented

A service schedule that matches your process planned downtime

Energy consumption is reduced by up to 20%

#### Ready to turn maintenance from a cost center to a strategic advantage?
