

Division Industrial Vacuum

Guideline for Energy Efficiency

February 2020

At Industrial Vacuum, we are committed to excellence in energy efficiency management. For us, energy efficiency is both a competitive and sustainability factor.

We are committed to achieving excellence together with our employees and through our working practices based on the following principles:

- The **continuous improvement** of energy efficiency and our EnMS is an **obligation** for us
- Necessary information and resources are provided for attaining our **energy goals**
- For us, **energy efficiency** begins with **procurement and engineering**
- It goes without saying that **legal requirements and those of our stakeholders** must be observed
- Energy efficiency is **measurable**
- Energy efficiency is the **duty** of every
- We **communicate openly** and work together as a team to achieve our goals
